

SUMMARY

Computer Science student in my last semester at Ben-Gurion University (GPA 84.7), passionate about software development. Skilled in C++, Python, and Java, with hands-on experience in backend logic, algorithms, and Solid understanding of C programming and basic Linux system programming through academic and personal projects. Enthusiastic about growing as an engineer in a high-scale, fast-paced environment. Available for a full time and part time role.

EDUCATION

B.Sc. Computer Science

October 2021-Today

Ben Gurion University of The Negev

WORK EXPERIENCE

Academic Projects

2022-2024

- **Networking:** Implementing in Linux both a server, which provides "Simple-Text-Oriented-Messaging Protocol" server services and a client, which a user can use in order to interact with the rest of the users, the server support both Thread-Per Client (TPC) and the Reactor pattern in Java while the client in C++.
- **Handwritten Arabic Text Recognition (OCR):** Developed a deep learning OCR model in TensorFlow combining CNNs and bidirectional RNNs with CTC decoding to recognize handwritten Arabic text from line images.
- **Ray Tracing:** Implemented a ray tracer using a Simple C++ OpenGL engine that shoots rays from the observer's eye through a screen into a scene of objects. The program calculates the ray's intersection with objects, finds the nearest intersection, and determines the color of the surface based on its material and lighting conditions.

Academic Tutor

2022-Today

- Design of Algorithms (course grade 91).
- Compiler Principles (course grade 99).

Volunteering

2022-2023

- Web Development And Computer Science Teacher For High School Students With Pearach - a National Program For Social Impact.

SKILLS & QUALIFICATIONS

- Programming Proficiency
- Problem-Solving Ability
- Algorithm Design
- Team Collaboration & Learning

SELF LEARNING

Online Courses

- Complete C# Unity Game Developer 2D
- Complete A.I. & Machine Learning, Data Science Bootcamp

languages

- English
- Hebrew
- Arabic
